

PETRA REINKE

Field Leader Immune System | Nominee Voting Member

Scientific Development/ CV:

Since 2020 Member of the BIH Research Platform Multiscale Omics, Humanized Model Systems and Cell Engineering and Digital Medicine, **since 2019** CART Coordinator (Charité) of the European University Hospital Alliance (EUHA), **since 2019** Steering committee member of the Charité/BIH Clinical Translational Sciences Platform (CTSP), **since 2017** Director of the Berlin Center for Advanced Therapies (BeCAT), **since 2006** Head of platform D “immune system”, Head of the GMP-Facility and Steering Committee Member of the BCRT, **1995 – 2017** Head of the “Kidney Transplant Outpatient Clinic” at the Dept.Nephrology CVK

Expertise:

Nephrology, Transplantation, ATMP, GMP manufacturing cell therapeutics, performing investigator-initiated and pharma-sponsored trials (phase I-III) in transplantation, cell therapy, intensive care.

Relevant Projects/ Highlights:

Project coordinator EU H2020 consortium “ReSHAPE” (2019-2022)
Steering board member large scale research initiative RESTORE (2018-)
Project coordinator EU FP7 consortium “BIO-DrIM” (2012-2018)
Work-package leader EU FP7 consortium “ONE- Study” (2010-2017)
Steering committee / work-package leader EU FP6 consortium “RISET” (2005-2010)

PETRA REINKE

Field Leader Immune System | Nominee Voting Member

- Realization of the joint (BIH/BCRT) implementation plan for the next 5 years
- Further development of the immune platform in the main areas “gene editing” and “next generation cell products”
- Promotion of young scientists at all levels and all developmental stages in the immune platform and in the entire BCRT (mentoring / young scientists)
- Incubator / HUB for cell and gene therapy
- Promotion and support of the tool cross field projects
