

16 March 2020

13:30-15:30

Workshop

Ready for Translation?

The role of supporting preclinical evidence
in justifying phase I/II trials
with somatic genome editing

KEY NOTE

(via video conference)

Philip John (P.J.) Brooks

Working Group Coordinator,
NIH Common Fund program on Somatic Cell
Genome Editing

NCATS Program Director,
Office of Rare Diseases Research

Program

13:30 Introduction: Daniel Strech, BIH QUEST
Center/Charité

**13:35 Ready for Translation: The issues with supporting
preclinical evidence:** Daniel Strech

**13:45 The new BMBF funding scheme for confirmatory
preclinical studies & and the accompanying DECIDE
project,** Ulf Tölch, BIH QUEST Center/Charité

**13:55 Reporting of robustness criteria in results
publications for preclinical genome editing,** Merlin
Bittlinger, BIH QUEST Center/Charité

**14:05 KEY NOTE: The NIH/NCATS funding requirements for
confirmation in preclinical somatic genome editing:
Rationale and experiences,** PJ Brooks, NIH/NCATS

14:30 Open discussion / Future directions
What should we expect from supporting evidence for phase
I/II trials? What activities help to meet these expectations?

15:15 Summary / Outlook

15:30 End of Workshop

Venue

BIH QUEST Center
Anna-Louisa-Karsch-Str. 2, 5th floor
10178 Berlin

Online participation:
