

## Disclosure and management of conflicts of interest in the BIH QUEST Center for Responsible Research<sup>1</sup>

### Definition

"A conflict of interest consists of various circumstances that collectively pose a significant risk that secondary interests will inappropriately influence professional judgement relative to primary interests" [1]. Within secondary interests, it should be differentiated between financial and non-financial interests. The resulting potential conflicts of interest are named by analogy: financial (direct and indirect) and non-financial (intellectual) conflicts of interest [2].

### Rationale

The primary interest of the BIH QUEST Center for Responsible Research and its members is to develop and implement new approaches to ensure that biomedical research is conducted in a trustworthy manner, produces useful results and meets ethical standards. This is done through the further development of concepts, methods and techniques, the holding of events and training, consultations and the publication of results from research on research (meta-research). The identification and management of conflicts of interest in the context of the BIH QUEST Center should minimise the risk of secondary interests unduly influencing professional judgement in relation to primary interests.

### Period

Conflict of interest disclosures relate to the current year and the preceding three calendar years.

### Disclosure and management of conflicts of interest

The leaders of the working groups of the QUEST Center disclose all direct and indirect conflicts of interest in a standardised form (see below). The completed forms from all members are published on the QUEST homepage and updated in case of relevant changes, or at least every year. In accordance with the general guidelines of the Berlin Institute of Health (BIH) at the Charité - Universitätsmedizin Berlin, all financially remunerated secondary activities of employees of the QUEST Center must be approved by the direct supervisor, the commercial management and the internal legal department.
