

BIH RESEARCH PLATFORM

CLINICAL-TRANSLATIONAL SCIENCES

The Clinical-Translational Sciences Platform (CTSP) with its components, the Clinical Study Center (CSC), the Berlin Center for Advanced Therapies (BeCAT), the Biobank, BeLOVE, Cell and Tissue harvesting, forms a central connector and catalyst in the process of developing novel therapeutic targets, strategies, markers or techniques into clinical medicine. In order to fulfill this challenge, the platform is currently in the process of establishing three areas that are closely interacting:

Fundament. Key to every translation into humans is the proper planning in accordance with the regulatory demands and international quality standards for the design and conductance of clinical trials. Key to innovation are proof-of-concept studies with well-established fast-failure measures. Key to innovative translation is the proper infra-structure to sustain successful innovations and foster clinical implementation. The CTSP, in close collaboration with the CSC, will provide these services and identify emerging services required for translation acceleration. Together with the development of new methods, engagement in the training of clinical and digital scientists, support of clinical excellence in their field and early inclusion of technology transfer will help accelerate the procurement of support for excellent and innovative practice-changing findings into clinical practice.

Clinical trials. The coordination and guidance through clinical trials is considered a key task. The Fundament is a central part to this. The proof that clinical trials are ongoing is considered as confirmation that the innovative-translational process is running. Within the steering committee this part has been identified as most important and will thus build the main part of the platform activity.

Steering Committee

Speaker:

N.N.

Deputy Speaker:

Dr. Sein Schmidt Charité, BIH

Prof. Dr. Stefan Anker	BIH, Charité
Prof. Dr. Lars Bullinger	Charité
Prof. Dr. Kai-Uwe Eckardt	Charité
Prof. Dr. Uta Höpken	MDC
Prof. Dr. Christof von Kalle	BIH, Charité
Prof. Dr. Ulrich Kintscher	Charité
Prof. Dr. Marcus Mall	BIH, Charité
Prof. Dr. Dominik Müller	MDC
Prof. Dr. Friedemann Paul	Charité, MDC
Prof. Dr. Oliver Peters	Charité
Prof. Dr. Geraldine Rauch	BIH, Charité
Prof. Dr. Petra Reinke	BIH, Charité
Prof. Dr. Britta Siegmund	Charité
Prof. Dr. Margitta Worm	Charité

Coordinator

Dr. Silke Wiedmann
