|-------------------------|--|
| Medical field | Gastroenterology / Pulmonary / Women's Health / Laparoscopy / Robotic Surgery |
| Product (name and type) | Preoperative warm-up, training and education solution |
| Growth stage | Positioning of Scale |
| Founders | Ran Bronstein (Co-founder, CRO, COO), Ariel Ben Moshe (R&D), Gilat Noiman (Director of Market Development and Strategic Partnership) |

Description of product:

The Company's comprehensive education solutions include top of the line medical simulators and a simulation management system and patient specific simulation. The virtual training stations provide preoperative warm-up for cross-disciplinary surgical procedures.

Project goal:

The concept of preoperative warm-up preceding surgical procedures has been considered and studied for over a decade, showing favorable results. The expected impact being improved outcomes and patient safety through reduced errors, improved precision and shortened procedure time.

Project type:

The company is looking for a partner at Charité to implement and validate preoperative warm-up packages in the field of laparoscopy endoscopy, bronchoscopy and robotic surgery, to co-develop new content packages and future applications and validation based modifications.

Estimated Project Duration: 12-24 Months.

Eligible by the IIA
