FIGHTING INFECTIOUS DISEASES

## Short profile Corolabs Ltd.

CHARITÉ/BIH-PARTNER WANTED!  
More information [here](#)

Medical field	Pulmonology, Infectiology, Other
Product	Alphazer® Deep-Lung Nebulizer, Medical Device, Treatment
Growth stage	Proof of Concept
Founders	Asaf Weinberger (Founder, CEO), Dr. Miron Hazani (CTO)

### Description of product:

Cololabs Ltd. provides Deep Lung Nebulizers and formulations for the prevention and treatment of infectious diseases by delivering medications to the alveoli situated in the deep lung. Our product is a proprietary drug-device combination, consisting of patented formulations, packaged with dedicated drug cartridges that fit into a unique deep-lung nebulizer.

### Project goal:

An inhaled drug/device combination to be prescribed for the treatment of Covid-19 and potentially other deep-lung infectious conditions where reaching the alveoli with significant dosages is required.

### Project type:

Our Deep lung nebulizer has undergone slight improvements to adapt it to ICU operation if necessary. We expect that the Pilot we are currently applying for in the EOI will yield to results that will lead to follow-on investigational activity. Estimated Project Duration: Preliminary estimate: 3-6 months.

Eligible by the IIA
