

Short profile DALI Medical Devices

CHARITÉ/BIH-PARTNER WANTED!
More information [here](#)

Medical field	Drug Administration
Product	Synnect® (Drug Delivery Device)
Growth stage	Development
Management	David Daily (CEO, Co-Founder, MSc. Biomed. Eng., MBA), Lior Raday (CTO, Co-Founder, BSc. Mechanical Eng.) Ziv Cahani (VP of Business Development and Marketing, BSc. Mechanical Eng., MBA)

Description of product:

DALI's Synnect® is a smart injection solution. It easily transforms regular syringe into a connected one, by switching only one component – the plunger rod.

Synnect enables tracking of the drug injection:

1. Provides accurate, continuous measurement of injected drug volume, even partial doses
2. Monitors the start and end of the injection

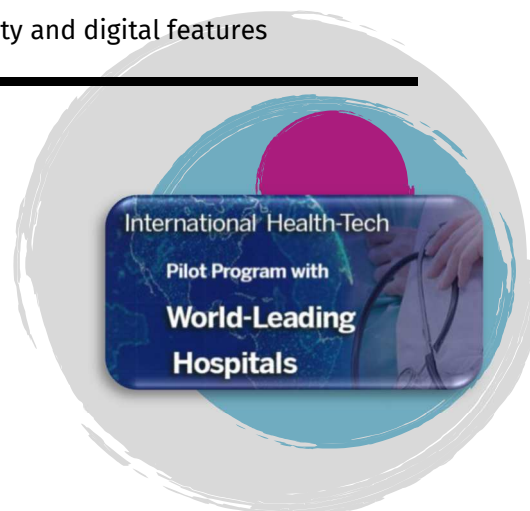

Synnect utilizes BLE to connect in real-time to a mobile app. and then transmit the data to a secure cloud. The Synnect can also be integrated with data management platforms and IT systems
By using the mobile app., the Synnect offers notifications, reminders, alerts and even guidelines. The Synnect gives the health care industry important benefits, both for home care and hospital care. When in use in busy hospital and clinical settings, Synnect improves accuracy and leads to a more streamlined workflow. At home environment, it offers more convenience for the patients and increase the compliance and adherence to treatment.

Project goal:

Pilot study to investigate the usability and digital features

Project type:

Proof-of-concept study

Eligible by the IIA
