

RevDx® Product of Efa Technologies

## Short profile Efa Technologies Ltd.

CHARITÉ/BIH-PARTNER WANTED!  
More information [here](#)

Medical field	Oncology / Hematology / Primary Care / Infectiology / Pediatrics / Other
Product (name and type)	RevDx, hand-held automated microscopy- based device for blood sample analysis
Growth stage	Seed
Founders	Yoel Ezra, Amir Lubashevsky

### Description of product:

RevDx - Revolution Diagnostic system- the first hand-held automatic microscopy-based device, designed to perform on-the-spot affordable hematology testing from a finger-prick in less than 5 minutes. RevDx portable location-based system will enable also a real-time Tracking and Mapping solution.

### Project goal:

Support treatment decisions near the patient, in the primary care for Pediatrician, Family physicians or during home-visit and homecare, early as possible to aid in the management of infections, antibiotic prescription only if needed, diagnosis of anemia and hematologic malignancies.

### Project type:

The company is looking for a partner at Charité to test and validate their device in different settings (primary care, home hospitalization and oncology patients) to generate use cases and evaluate further applications. Estimated Project Duration: 6 Months.

Eligible by the IIA
