

Short profile

Fitango Digital Health (DAB), LTD

CHARITÉ/BIH-PARTNER WANTED!
More information [here](#)

Medical field	Patient Management, Primary Care, Telemedicine, Patient Engagement, Value-based Healthcare
Product (name and type)	Fitango Health - Patient Management including Active Patient Engagement, Remote Patient Monitoring and Telemedicine.
Growth stage	Pre-Commercial, doesn't require FDA approval
Founders	Yoav Ben-Dror (Founder), Dov Biran (Founder, CEO)

Description of product:

Fitango Health offers an integrated cloud-based, white label solution that is interoperable with existing EMRs and data sources. The solution is accessible on the web and on iOS and Android mobile devices. The product supports care management, remote-patient monitoring, active patient engagement, population health and health analytics.

Project goal:

Patients live longer and better if they are engaged and use a patient-reported outcomes measurement information system (PROMIS) to determine when to visit a doctor or outpatient service while reducing the economic burden on the healthcare system.

Provide a medical-grade capabilities that can be prescribed to patients and monitored by the care team.

Project type:

To test, validate and co-develop the out-of-the-box telemedicine solution for Germany to provide patients with PROMIS (Patient-Reported Outcomes Measurement Information System) assessment system on their mobile devices to measure health symptoms and health-related quality of life domains, regardless of where the patient is physically located. The Charité partner will select an outpatient service facility to test the model. Est. Validation Time: 12 Months, Estimated total project duration time: 1.5-2 years
