CHARITÉ/BIH-PARTNER WANTED!
More information [here](#)

Medical field	Integrated health IT , Care Settings and Processes , Weight Management
Product	H-MAPS (Hospital Management for Assets Patients and Stuff), Health Care IT
Growth stage	Proof-of-Concept
Founders	Eli Ariel (Founder, CEO), Miri Ariel

Description of product:

Indoor navigation system - which will allow any GPS (smartphone) turn-by-turn navigation in the hospital. Tag attachment will allow for critical equipment and other hospital monitoring. Using the staff smartphones app's (which will allow this) will allow to know where the required staff at emergency is. An integrated tag with biological sensors (third party, or optionally developed in the program) will allow to know the location and status of the patients.

Project goal:

Management, monitoring and alert machine that watches everything in the hospital and can make fast decisions based on big data analysis and machine learning. Assign the optimal nearby human and machine resources to handle any situation for the best result.

Project type:

Clinical trial to investigate the pilot system

€ Eligible by the IIA
