

# Short profile (Medisim Ltd)

**CHARITÉ/BIH-PARTNER WANTED!**  
More information [here](#)

Medical field	Other, Cancer, Orthopedic Surgery, Pulmonary, Urology, Other
Product	Temple Touch Pro™ (TTP™), Medical Devices / Diagnostics
Growth stage	Development
Founders	Mr. Ilan Vadai (CEO and co-founder), Mr. Moshe Yarden, (CTO and co-founder), Mr. Yossi Wittman (VP of Business Development)

## Description of product:

Temple Touch Pro™ (“TTP™”), is a non-invasive, continuous, core temperature monitoring system for hospital use. TTP™ is a cost-effective perioperative solution that meets a variety of clinical needs in hospital settings and procedures, which require continuous and non-invasive temperature monitoring, for patients which are awake, and under all anesthesia types: general, local and regional.

## Project goal:

Support commercialization by generating additional evidence to support positioning TTP™ as the standard of care.

### Resources Required from Potential Partner Hospital/:

- Perform a product evaluation; Write a case study
- Promote our technique in guidelines;
- Assist in preparing a Health Technology Assessment (HTA);
- Recruit patients for early alert of sepsis clinical trial (optional);
- Provide feedback/insight/barriers/price targets; and
- assist in co-commercializing the product with relevant local distributors.

## Project type:

Estimated Project Duration: 12months

Eligible by the IIA
