

MetaboList

Short profile MetaboList

CHARITÉ/BIH-PARTNER WANTED!
More information [here](#)

Medical field	Nutrition (Cardiovascular/Weight Management/Gastroenterology)
Product	Treatment (Clinical Decision Support system)
Growth stage	Proof of Concept
Team	Eran Dariel, Yaron Gilboa, Dr. Ilana Dariel, Tzadok Kima, Aviva Shemesh

Description of product:

MetaboList is an expert-system for clinical therapists that analyses the chronic patient complete medical profile (chronic diseases, prescription-drugs, allergies, intolerances, biomarkers, microbiome...) and generates the patient's Food-ID™. Metabolist is a web application that functions as a Clinical Decision Support system to assist and simplify the therapist task. The input is the patients' medical record (through EHR or questionnaire) and the outcome are nutritional guidelines and a patient application that simplifies the patients understanding and compliance to these recommendations.

Project goal:

Our goal is to change clinical nutritional service from today's manual task to the Digital-Health era.

Project type:

The co-developed outcome is the Digital Era of personal clinical nutritional treatment enabling to analyze the complete medical condition of an individual integrating traditional practice with new medical disciplines such as Microbiome and in the future (once validated and accepted scientifically) nutrigenomics and other omics. Estimated Project Duration: 12 months.
