

Balanseat
keep your balance

CHARITÉ/BIH-PARTNER WANTED!
More information [here](#)

Short profile

Mopair Technologies Ltd.

SET

Seated Exercise Technology

Medical field	Rehabilitation
Product (name and type)	Balanseat AP, Medical Device
Growth stage	Proof of Concept
Founders	Uri Halperin

Description of product:

Balanseat by Mopair trains walking to those who lack the power to exercise walking again, or those, who need walking preservation training until they are allowed to walk again. Balanseat trains the whole body in a walking emulated motion but yet does not require an attending therapist during the treatment. The training is done while sitting, when shoulders, pelvic and thighs platforms are moving in a gentle contra-lateral movement.

Project goal:

Clinic: Improve walking ability and thus quality of life in frail and elderly patients.

Company: Materialize and validate the clinical values of the device. Test and market the product.

Project type:

Clinical study. Mopair is open to discuss potential partnership models.

Estimated duration: 12-14 months (flexible).

Eligible by the IIA
