

NanoVation

Short profile

NanoVation – GS Ltd.

CHARITÉ/BIH-PARTNER WANTED!
More information [here](#)

Medical field	Pulmonology, Intensive Care, Primary Care, Cardiovascular
Product (name and type)	SenseGuard, Medical Device
Growth stage	CE approved
Founders	Dr. Gregory Shuster (CEO, Co-founder), Prof. Haick (CSO, Co-founder)

Description of product:

SenseGuard (CE approved) is a reliable solution for spot-testing or continuously monitoring patients with respiratory diseases, such as COPD. It is a wireless, wearable device that enables continuous, seamless and non-invasive measurement of patient's lung function in both healthcare and home settings.

Project goal:

Clinic: Improve compliance and outcome by monitoring lung function.

Company: Validate product, market research. Scientific research, technology and product validation through the evaluation of accuracy, usability and impact and product's adaptation inputs.

Project type:

Clinical Study (6-18 months) for research and validation of the SenseGuard.

Estimated project duration: 24 months.

Eligible by the IIA
