More information [here](#)

Medical field	Environment/hospital
Product (name and type)	Garment Dispensing Unit (D300), Garment Retrieval Unit (R310), Total Care Manager (System Management App)
Growth stage	Transition to Scale
Management	Yariv Matzliach (CEO), Adi Keinan (COO), Shimrit Marom (VP Marketing), Yulya Kanarsh (VP int. Sales), Etgar Marcus (VP R&D & Eng), ItzikMor (VP Operations), Tomer Poliner (President & CBDO), Assaf Karmi (Director of Service), Roger Hecker(VP Strategic Accounts)

Description of product:

The company has developed an innovative solution for automated medical workwear management. The solution is comprised of a Garment Dispensing Unit (D300), a Garment Retrieval Unit (R310), and an advanced AI-driven System Management App (Total Care Manager). The dispensing machines are reliable and durable based on fast and simple to use user identification. The return units are convenient and space-saving for the collection. The Total-Care Manager is an intuitive cloud-based workwear management application that connects to all dispensing and return machine units. The system allows for a high level of hygienic standards by tracking actual workwear usage and generating actionable alerts to ensure medical workwear availability.

Eligible by the IIA
