

SERENUS AI

Short profile Serenus.AI

CHARITÉ/BIH-PARTNER WANTED!
More information [here](#)

Medical field	Several
Product	AI-based medical platform
Growth stage	Product Stage: Released
Founders	Hillary Harel (CEO, Co-Founder), Prof. Josef Elidan (Co-Founder, CMO), Dan Berachowitz (Co-Founder, CTO)

Description of product:

Clinically objective, AI-based, automated case-by-case review system to improve decision-making before medical procedures.

Project goal:

Clear ROI for improving clinical workflows and patients' outcomes. Prospective learning revealing new insights with regards to patients' profiles, treatment protocols and outcomes. Commercial licensing agreement.

Project type:

A customize user interface that will consider the clinical workflow and the various possible users, shall be developed. Then a pilot to demonstrate the successful implementation shall be conducted and thereafter full deployment. Feedback from partners shall be provided regarding the ease of use, the experience and the benefits arising from the usage of the solution. Following the pilot, prospective federated learning shall be implemented both for the optimization to the solution and for revealing insights even beyond the guidelines today, which is a meaningful asset to the medical field. Estimated Time for Validation: 1-2 years. Estimated Project Duration: 2 years.
